

***Princeton College Consulting  
Can Help You Navigate Where You Are,  
Where You Want to Be, and How to Get There!***

My wife and I wanted to thank you for the time and effort you put into our son's application process. Your insight and professionalism turned a chaotic, emotional quagmire into an organized, efficient goal-oriented process. We were all very lucky to find you. As you may remember, we found your company while searching for our daughter who is currently a junior. Your's seemed more professional than the other services out there and it clearly is. We will be in touch to discuss our son's college options and then soon after, our daughter will start working with you.

*-- Dr. S. Smith - Parent of Student attending  
The University of Virginia*

Working with Princeton College Consulting made the college application process so much less stressful and more efficient. My counselors were very knowledgeable about colleges and kept a close eye on my progress. We met a lot and they were always flexible with my schedule. The most helpful part to me was that my counselor guided me through the essay topics when sometimes I wasn't even sure where to begin. The continuing conversation between my counselor and I inspired my ideas and writing. I am so happy I had their help!

*-- Y. Zhang, Attending the University of Rochester*
